Skills

Languages: Java, Python, C/C++
Backend: Spring Boot, REST, AOP
Databases: MySQL, PostgreSQL, MongoDB
Cloud: AWS (Lambda, SNS, S3, DynamoDB, Glue, Firehose)
Tools: Git, Swagger, Postman, Kibana, DataDog, Coralogix
CP: CodeChef 4* (MAX 1818), LC Top 14.5%

Experience

Kotak811 | *SDE - I, XSell* **Oct 2025 - Current**

Loan Leads

- Built and maintained the **LoanLeads** microservice, capturing user intent across Gold, Car, Two-Wheeler, Business, and other loan categories.
- Developed and launched new **app-specific journeys** for Car, Two-Wheeler, and Gold Loans, expanding mobile funnel coverage and improving conversion accuracy across key products.
- Implemented **API versioning** and a **flag-controlled DIY redirection flow**, ensuring backward-compatible rollout of new journeys while enabling users to self-navigate to relevant products.
- Enhanced observability with **structured logs**, **Coralogix dashboards**, and **alerts**, improving debugging, triage, and system reliability.

Moneyview | *SDE - I, LOC* **July 2024 - Sept 2025**

LMS

- Refactored the legacy LMS flow to progressively **re-route traffic to the new system** using a **time-based feature flag**, ensuring seamless transition without impacting existing clients.
- Optimized NPA PAN update job using **Lambda-based batching** grouped by creation date, enabling fast daily processing for updates and deletions.
- Extended **LMS logging and incident automation** by routing non-200 responses to DB, exporting all responses to **S3 Parquet** via Firehose+Glue, and integrating **SNS + Lambda + CloudWatch alarms** for proactive alerts.

Superhome

- Executed large-scale **retro data migration** loading **40M+ valid records** into DynamoDB with validation and historical consistency.
- Enhanced **Superhome Lambdas and app integrations** to support new events (e.g., **MCOINS, UPI**) and dynamic nudges such as Payment Requests and Activate UPI Lite.
- Owned backend ingestion + processing for **Personal Finance Management (PFM)** data, storing spends, budgets, and categories and serving dynamic responses to the app.
- Developed **generic DynamoDB modules** with pagination-enabled GET/UPDATE and integrated them into legacy **JSP admin portals** with userId-based validation.
- Implemented the **SystemProperty service** with enum-based storage and automatic type conversion.
- Built infra including **versioned banner/card rollout**, **generic cache controller**, and **Slack-based monitoring** to improve configuration management and observability.

SmartPay

- Built **document management APIs** for S3 upload/download with file validation, duplicate detection, and dealer-specific approval configs (**Mandatory/Optional/Disabled**).
- Implemented **AOP-based access control** with custom annotations enabling dealerId/schemeId-driven API and page access.

Moneyview | *SDE Intern, LOC* **Feb 2024 - June 2024**

SmartPay

- Enhanced **SmartPay** with dynamic interest rate logic and support for **multiple dealer add-ons** (VAS, Insurance, etc)
- Created Python scripts to generate queries from CSV for large-scale merchant/dealer onboarding automation.
- Designed a modular **reward system** supporting fixed and percentage discounts with future extensibility for cashback and points.

Achievements

- **Best Student of the Institute** for the 2024 batch
- Winner of **Smart India Hackathon 2022** under Statement "Use of AI/ML for Aid of Teachers"

Education

BMS Institute of Technology & Management **2024**
Bachelor of Engineering in Information Science CGPA: 8.93
